

Hytek

The Next Generation in Protekt® Backsheets

Quality Innovation

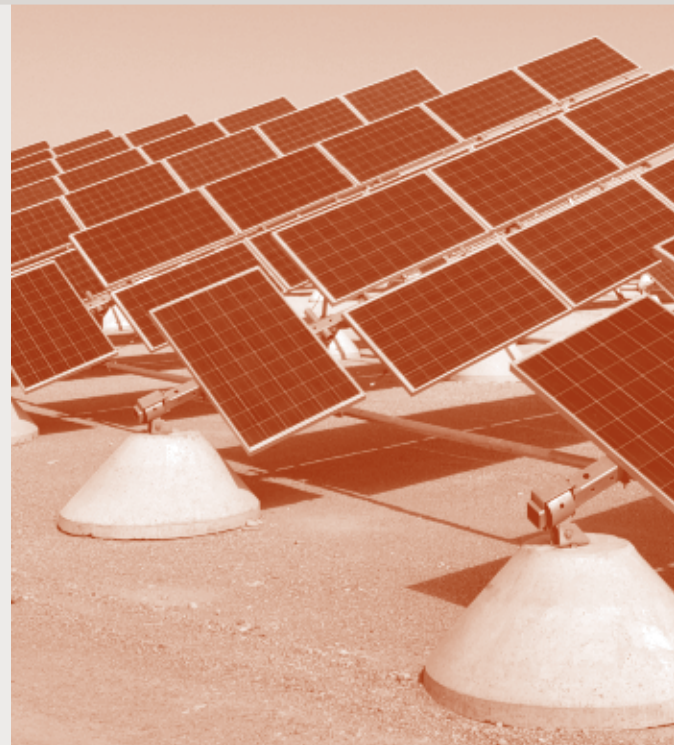

At Madico, our manufacturing expertise allows us to implement design advancements within a precision process. This results in new, high performing products offered at a competitive price. We never sacrifice quality for cost, and believe in the long-term durability of our products. Hytek is the next level of innovation in Fluoro-coated backsheets, based off of the six-year, in-field performance of our Protekt® product line.

Improved Performance over Protekt®

- Enhanced X-Hatch Adhesion
- Lower MVTR
- Higher Surface Energy
- Improved UV Stability
- Improved Optics and Aesthetics
- Increased surface energy

Prime Version Additional Advantages:

- 3000 Damp Heat
- High RTI
- Varying thicknesses for tailored applications

Hytek Product Options:

- **Hytek**
Standard product
- **Hytek Prime**
Higher performing product
Specially formatted for higher RTI
