

Partial Discharge Test

on reverse side foils of PV modules
 according to IEC 60664-1, IEC61730

3. September 2014

Company / Examined foil:

Madico Inc.	
Reflekt Lean Prime	
Fluoropolymer coating	10 micron
PET	51 micron
Adhesive	5 micron
PO	203 micron

Number of measurements: 10

Remarks: none

Extinction voltage		Deviation from the mean value (%)
Min. value in (V)	1020	-11.0
Mean value in (V)	1146	
Max. value in (V)	1202	4.9

The mean value minus the experimental standard deviation will be used to calculate the max. permissible voltage.

Experimental standard deviation: 57 V

Calculation of the max. permissible operating voltage on the basis of the ascertain values

Basis: IEC 60664-1

$$U_{max} = U_e \times 1,414 / 1,2 \times 1,25$$

- 1.414 Calculation of the peak value
- 1.2 Safety factor (humidity, temperature, etc.)
- 1.25 Safety factor (double or reinforced insul.)

Maximum permissible system voltage	1027 VDC
